Custom Website Development

Dear Board Member:

Have you ever considered creating a website for your water district? Many water districts have found that a custom website helps them more **affectively communicate with their residents**. If a custom tailored website sounds interesting, the enclosed CD will help answer some common questions about how easy this process is and how to get started.

Simply insert the enclosed CD into your computer. It is not necessary to be connected to the internet. The presentation should start automatically, but if not please click on the *index.htm* file located on the CD. This presentation is also available at <http://www.go-texan.com/waterweb> for other board members to see the benefits of creating a custom water district website.

If you have any additional questions, please don't hesitate to contact me by phone or email. I look forward to working with you to create an exciting water district website.

Let's make it happen,

Mack Alexander
